

Autopack Tray & Shrink Packaging Systems

Autopack Co., Ltd. is an Australian and Thai joint-venture company with 35 years of experience in design, manufacture, and service of Shrink and Tray Packaging Systems. The machines are built with specific options for Pharmaceutical, Cosmetic, Food, Beverage, Chemical, and many other industries. Autopack is a unique combination of Western technology and management with Eastern manufacturing. Our machines are designed by Europeans, and assembled in Thailand under their supervision, resulting in quality machines at attractive prices.

Currently Autopack is producing over 160 machines per year, of which 70% are destined for international markets. Autopack machines can be custom configured for large or small companies and to suit local or company requirements such as electrical and safety as well as demands for line integration and functionality. Autopack machines have over the years earned a reputation reliable, easy to adjustment, with low if any maintenance.

They are specifically designed to occupy minimum floor space and operate at high efficiency, Autopack machines translate to maximum savings in machine cost, less floor space utilisation, and minimum raw material and electrical power consumption. The Autopack "Package" has proven to be the best option for shrink packaging solutions for many of our customers.

It is not possible to list all of our two thousand or so customers, however it is worth pointing out that our biggest customer is Tetrapak of Sweden, for whom we have designed and manufactured a Tandem style multi-packer under their own Tetrapak name. To date we have delivered some 350 machines to Tetrapak which have been installed worldwide. Below is a list of some, but not all of our customers:
